

Innovating Compliance with Enhanced Learning

Introduction

At Skillcast, we go beyond generic training. Our enhanced learning solutions help you deliver relevant, targeted training that reduces training time, boosts engagement, and drives real behavioural change.

From FastTrack courses and diagnostics to embedded microlearning and AI support with Aida – our tools help you cut through the noise and focus on what matters: smarter learning, reduced risk, and better outcomes.

Compliance made simple

Your Challenges, Solved

Go directly to the challenge you want to solve first.

- 1. Too Much Training, Too Little Time**
Reduce hours, not impact (p.4)
- 2. Cyber Threats Are Getting Smarter**
Embed awareness where it matters (p.5)
- 3. Addressing Learner Fatigue**
Reignite engagement and interest (p.6)
- 4. One Size Doesn't Fit All**
Tailor training to risk and role (p.7)
- 5. New Regulations? No Problem**
Stay ahead of complex compliance changes (p.8)
- 6. Spot Red Flags Before They Cost You**
Use insights to act sooner (p.9)

1. Too Much Training, Too Little Time

Challenge:

Sally, an L&D Manager, is receiving constant feedback: “there’s too much training!” She needs to cut seat time without sacrificing compliance.

Skillcast solution:

FastTrack courses start with a pre-assessment. If staff pass, they skip straight to a concise version of the course.

Diagnostic assignments ensure follow-ups target only those who need it.

Result: Cut hours, not corners

- ✓ Only staff who need full content take it
- ✓ Employees feel their time is respected
- ✓ Insights show exactly where knowledge gaps exist

2. Cyber Threats Are Getting Smarter

Challenge:

With headlines full of high-profile cyber attacks, Mohammed knows a one-off course won't protect his organisation. He needs a solution that reinforces awareness weekly.

Skillcast solution:

Nudge Learning delivers short, randomised cyber security questions every Monday, helping staff build habits that stick.

Embedded Microlearning ensures training videos appear in company emails, right at the point of risk.

Result: Awareness built into everyday actions

- ✓ Training delivered where it matters most
- ✓ Awareness becomes part of the daily workflow with ongoing reinforcement

3. Solving Learner Fatigue

Challenge:

Staff are disengaged, clicking through training just to get it done. Your current programme feels stale.

Skillcast solution:

Diagnostics ensure staff only see relevant training.

Aida AI Assistant provides on-demand answers, making training more conversational and less passive.

Microlearning Bites add variety with videos, quizzes, and scenario-based learning.

Result: Training that feels dynamic and valuable

- ✓ Staff only take what's relevant with personalised pathways
- ✓ Fresh content reignites interest and engagement

4. One Size Doesn't Fit All

Challenge:

After reviewing feedback, Juanita finds that last year's training was either too long for some staff or not detailed enough for others.

Skillcast solution:

FastTrack courses assess knowledge first – staff who pass skip straight to the refresher course.

Risk-based pathways ensure specific roles receive in-depth training, while lower-risk staff are assigned concise microlearning.

Result: Every learner gets exactly what they need

- ✓ The right content for the right people
- ✓ Resources focus where risk is greatest

5. New Regulations? No Problem.

A new legislation has arrived. It's complex, time-sensitive, and affects the entire organisation. Sunil needs to roll out training quickly, but also ensure staff truly understand it.

Skillcast Solution:

Spaced Learning allow staff to build knowledge gradually through staged modules.

Bite-sized microlearning provides targeted lessons, over the course of the year.

Aida AI Assistant ensures staff get instant answers to policy questions, freeing Sunil from repetitive queries.

Result: Stay compliant without overwhelming

- ✓ Comprehensive understanding over time
- ✓ Staff feel confident with answers on demand

6. Spot Red Flags Before They Cost You

Challenge:

You don't know what your staff really understand, or where the gaps are that could put your company at risk.

Skillcast solution:

Diagnostic Assessments uncover knowledge levels across teams and smart assignments ensure content is delivered only where needed.

Embedding compliance into daily workflows enables employees to access resources exactly when they need them, while reporting tools highlight red flags early for timely intervention.

Result: Insights that lead to measurable impact

- ✓ Full visibility with clear data on where risks lie
- ✓ Training becomes smarter, strategic and not just routine

Our comprehensive solution

Skillcast Enhanced Learning integrates effortlessly with your Skillcast LMS, engaging employees with interactive and personalised content.

By assessing employee knowledge and tailoring training accordingly, we streamline administrative tasks, allowing you to focus on critical compliance issues while saving time and money.

Compliance made simple

Ready to tackle your training challenges?

Whether you're reducing training hours, responding to new risks, or driving engagement across your workforce – Skillcast gives you the tools to deliver compliance that's smarter, flexible, and effective.

Our **enhanced learning** solution is built to:

- ✓ Personalise content based on role and risk
- ✓ Reinforce behaviours through ongoing microlearning
- ✓ Save time with diagnostics and FastTrack options
- ✓ Support learners with AI-powered guidance from Aida
- ✓ Give you clear insights with smart reporting
